A.Tille. Purification and characterization of catalytically active precursor of rafil A.Reference number: $17492; MUID:91378548; PMID:1898068
A.Recession: $17492
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A Pathway: ethanol catabolism
A.Note: enzymes with this activity are involved in diverse metabolic pathways in variation and energy of this activity and elebyde debyde debyde debyde debyde debyde debyde debyde debyde for the state of the s
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    A; Description: catalyzes the oxidation of an aldehyde to an acid using NAD: and water A. Pescription, catalyzes the oxidation of an aldehyde to an acid using NAD+ and water A.Pathway, chlanol oddabolism.
A.Pathway, chlanol oddabolism activity are involved in diverse metabolic pathways in vari S.Noter: enzymes with this activity are involved in diverse metabolic pathways in vari C.Superfamily: aldehyde dehydrogenase (NAD+); aldehyde dehydrogenase (none) og S.Esywords, alcohol metabolism, homed etramer. Liver, mitochondrion, NAD, exidoredue ta F.58.72/Domain: aldehyde dehydrogenase homology <ALDD+.
E.288.762/Domain: alchydrogenase homology <ALDD+.
E.288.762/Active site: Glu, Cys #status predicted

A.Roccure type: Protein
A.Roccure type: Protein
A.Residues: 22-34 *LEE.
A.Roccure type: Brain
C.Compon: This enzyme may be responsible for gamma aminobutyraidehyde dehydrogenase act
C.Compon: This enzyme may be responsible for gamma aminobutyraidehyde dehydrogenase act
C.Compon: A.Roccure theorem of an aldehyde to an acid using NAD: and water
A.Pathway. ethanol catabolism
A.Roccure enzymes with this activity are involved in diverse metabolic pathways in various
C.Superfamily: aldehyde dehydrogenase (NAD:): aldehyde dehydrogenase homology
C.Reywords: alcohol metabolism; homotetramer; liver; mitochondrion; NAD; oxidoreduriase

By 128788
Ashap position: 9p13-9p13
Ashap in the only introduced by the initiator moden
C.Complex: homotetrament (probably)
C.Function: astalyses exidation of an algebyge to an acid using Nate and water
Aspersificion: astalyses exidation of an algebyge to an acid using Nate and water
Aspersferior: astalyses exidation of an algebyge dehydrogenase homology
C.Reywords: alcolod metabolism, benefetianed: Tver, mitochendianion, NAt, exidered
E.1-20/Domain: transit peptide (mitochendian) #status predicted and acid wars
F.1-21/Froduct. aldehyde dehydrogenase (NADP)
F.25-319/Active site: Glu, Cys #status predicted
F.25-319/Active site: Glu, Cys #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 7
